1. BASIS OF PRESENTATION AND CONTINUANCE OF OPERATIONS

The interim period financial statements have been prepared by the Company in accordance with Canadian generally accepted accounting principles. All financial summaries included are presented on a comparative and consistent basis showing the figures for the corresponding period in the preceding year. The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of annual financial statements. Certain information and footnote disclosure normally included in financial statements prepared in accordance with Canadian generally accepted accounting principles has been condensed or omitted. These interim period statements should be read together with the audited financial statements and the accompanying notes included in the Company's latest annual filing. In the opinion of the Company, its unaudited interim financial statements contain all adjustments necessary in order to present a fair statement of the results of the interim periods presented.

The Company is in the process of developing its mineral properties and is in the start-up phase of commercial production. The recoverability of the amounts shown for mineral properties and related deferred exploration costs are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production.

These financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future.

2. RECLAMATION BOND

During the year ended December 31, 2004, the Company provided a \$50,000 irrevocable letter of credit as a condition of approval to a Work System and Reclamation Program Permit issued by a B.C. Ministry of Energy and Mines. The Company secured the letter of credit by placing a \$50,000 term deposit with its bank and received the Permit on April 8, 2004 which permitted the Company to mine 110,000 tonnes of product. As a condition of obtaining the permit, the Company agreed to post an additional security at the rate of \$1.00 per tonne mined in 20,000 tonne increments up to 110,000 tonnes. The Company is also subject to certain other operational inspections.

4. MINERAL PROPERTIES (continued)

The Company entered into a Letter Agreement dated February 3, 2005 with Lumina Copper Corp. ("Lumina") for the exploration development and mining of mineral resources within the North Island Apple Bay Claims. Lumina may earn a 100% interest in the property by making a total of \$200,000 in cash payments over a period of three years to the Company and upon a production decision, paying an additional \$800,000 in cash or shares. The Company retains the right to explore and exploit the property for non-metallic industrial minerals, and in addition, Lumina grants the right to the Company to explore its Hushamu claims for non-metallic industrial minerals. At December 31, 2005, the Company has received a \$20,000 option payment from Lumina and received an additional \$40,000 in February 2006 and \$60,000 in February 2007 pursuant to the terms of the Letter Agreement.

5. LOAN PAYABLE – MAJOR CUSTOMER

During the period, \$345,168 (2006, \$2,441,269) of the Company's sales were to one customer located in the USA. These sales are pursuant to a purchase agreement dated April 1, 2004 which is for an initial term of five years.

Concurrent with this purchase agreement the Company and its major customer entered into a loan agreement dated April 1, 2004 whereby the major customer agreed to establish a secured demand loan facility to enable the Company to purchase production equipment. All advances bear interest at 8% per annum and are repayable on the basis of \$1.50 per tonne of product purchased by the major customer by deducting the appropriate balance from the sales invoice representing the purchase by this major customer. A total of \$517,851 was advanced. During the period the Company owed \$258,415 (December 31, 2006 \$315,428) under this loan facility. Total repayments in the period totaled \$21,708 (December 31, 2006 \$87,580) and accrued interest of \$5,067 (December 31, 2006 \$16,445).

6. DUE TO RELATED PARTIES

As at June 30, 2007 a total of \$135,083 (December 2006 - \$100,348) is payable to directors for fees, royalties and expenses. These outstanding amounts payable are unsecured and non-interest bearing with no fixed terms of repayment. The fair value of the debt is not determinable as it has no repayment terms.

The Company entered into the following transactions with related parties this period:

- a. Paid or accrued management fees of \$22,600 (June 30, 2006 - \$6,000) to officers of the Company.
- b. Accrued geological fees of \$24,000 (June 30, 2006 - \$13,850) to the Company's president that were included in Apple Bay exploration costs.
- c. Paid royalties totaling \$12,199 (June 30, 2006 - \$14,224) and \$11,404 (June 30, 2006 - \$5,742) of general expenses, were paid or accrued to the President and a company controlled by the President.

These transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

7. ROYALTIES PAYABLES

The Company entered into a Participation and Royalty Agreement with the Quatsino First Nation dated August 20, 2003 which grants the Company the exclusive right to mine certain claims over the term of the agreement expiring June 30, 2013. As consideration, Homegold transferred 400,000 common shares of the Company to the Quatsino First Nation and a member has been appointed as director of the Company. A royalty of \$1.00 per metric tonne is also payable. Payment for one half of the royalty is deferred until production exceeds 200,000 metric tonnes in a calendar year. As at June 30, 2007 an amount of \$207,706 (December 31, 2006 \$178,858) is owed under this deferral arrangement. On March 13, 2006 the Company received a long-term permit from the B.C. Ministry of Energy and Mines to mine up to 249,000 metric tonnes annually. The Company does not expect to produce in excess of 200,000 metric tonnes in 2006 or 2007 and therefore the amount owing under the deferral arrangement has been classified as a non-current liability at June 30, 2007.

8. SHARE CAPITAL (continued)

During the quarter ending June 30th, 2007, 235,261 stock options were exercised at a value of \$23,526 and a private placement was completed issuing 1,250,000 flow through shares at \$0.08 for proceeds of \$100,000 with one year \$0.12 attached warrants expiring April 11, 2008.

On May 4, 2006 the Company closed a non-brokered private placement of 1,876,667 units at a price of \$0.12 a unit of which 1,756,342 units were issued to June 30, 2006 and the balance of 120,325 were issued on July 10, 2006. Each unit consists of one common share and one purchase warrant. The warrants are exercisable from the date of grant at \$0.20 in the first year and \$0.30 in the second year and expire on May 4, 2008. The Company used \$110,000 of the proceeds to post a reclamation bond totaling \$160,000 and release the five individuals from the bond they posted on the Company's behalf.

Flow-through Shares

In accordance with accounting recommendations relating to the issuance of flow-through shares, the Company reduced from flow-through share proceeds assigned to share capital and recognized as a future tax liability, the estimated tax effect of the timing difference resulting from renouncing exploration expenditures using currently enacted tax rates and laws.

Concurrently the Company recognized a future income tax recovery from the utilization of available tax losses of prior periods to offset the future tax liability recognized. The Company has not previously recognized tax benefits relating to losses of prior periods as the criteria for recognition has not been met.

Stock Options

The Company follows the policies of the TSX Venture Exchange (TSX-V) under which it is authorized to grant options to executive officers and directors, employees and consultants enabling them to acquire up to 10% of the issued and outstanding common shares of the Company. Under the policies, the exercise price of each option equals the market price of the Company's shares as calculated on the date of grant. The options can be granted for a maximum term of 5 years.

Stock option transactions are summarized as follows for the period ended June 30, 2007.
